## Professional Summary

I'm a freshly graduated Software Engineer and new to web development having focus on building clean, responsive, and user-friendly websites using HTML, CSS, and JavaScript. I enjoy creating interactive front-end features, designing simple yet effective user interfaces, and learning how to bring ideas to life on the web. My main focus is on developing practical projects that improve my skills while delivering smooth and engaging user experiences.

## Technical Skills

Skills: HTML, CSS, JavaScript.

## Projects

### *To-Do List — Task Management Web App*

A sleek, accessible, and responsive To-Do app built with HTML, CSS, and vanilla JavaScript. Stores tasks in the browser local Storage, supports add/edit/delete, drag & drop ordering, filters (All / Active / Completed), keyboard shortcuts.
